REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 1-8 are allowable over the prior art of record, because the prior art is silent to ~~an~~ a method for bonding a first element of an electrochemical cell stack to a second element of the cell stack comprising: providing a complex groove with a first sealing surface having one raised portion and one depressed portion; wherein the raised portion is located above the depressed portion; and the raised portion is configured to receive and retain a bead of adhesive.

Claims 9-36 are allowable over the prior art of record, because the prior art is silent to an electrochemical cell comprising: a sealing groove having a complex cross-sectional shape, wherein a first portion of the sealing groove is configured to receive an adhesive, and the second portion is configured to receive some of adhesive that is displaced from the first portion during assembly of the cell.

The prior art, such as Mizuno U.S. Pub. 2002/0064703, teaches a seal for a fuel cell that comprises a bead portion that deforms upon impact of a second sealing element. The reference is silent to a complex groove having a first portion configured to receive an adhesive, and a second portion configured to receive some of the adhesive that is displaced from the first portion during assembly of the fuel cell stack. Therefore, the subject invention is patentably distinct from Mizuno.

Conclusions

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
